

Instructions and Helpful Hints

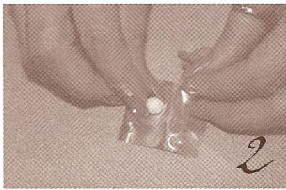

PLEASE READ COMPLETELY AND CAREFULLY! To achieve the best results, this kit should be used as soon as it is received and all hands handling the clay should be clean, dry and free from lint or fuzz.
FIRST, PRACTICE THE STEPS BELOW WITH THE COLORED CLAY SUPPLIED WITH THIS KIT.
UNLIKE THE SILVER CLAY, THIS CLAY WON'T DRY OUT AND MAY BE USED OVER AND OVER!

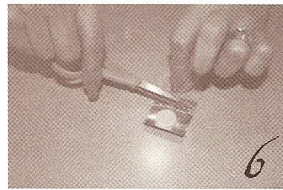

Remove sealed silver package from small kraft envelope and tear open carefully. Unfold and invert plastic to remove clay. Working quickly, gently knead to soften and re-shape clay into a ball. **DO NOT** roll in palm.

Lift the finger slowly and gently to see the print. Do only once for the best results. It is not recommended to re-do the print. Expect some irregularities... this is what keeps them unique!

Place reshaped ball of clay between the layers of mylar square.

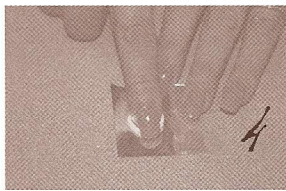

Remove the clear flap and leave imprinted clay on silver mylar to dry undisturbed overnight. The print will slide off when completely dry. Place dried fingerprint in the provided jewelry box and return along with completed form below. Each print

Using something hard, flat and smooth, press down on top of the clear flap until the clay is approximately the size of a dime or penny. This helps to remove any unwanted lines.

must be accompanied by a completed form and kept together when returning multiple prints. Using provided return label, apply correct postage and return in padded envelope to Prairie Creations. Postage due packages will be returned to you for extra postage. Multiple prints may be shipped in same package with completed forms.

Lift the clear mylar flap slowly, and using firm pressure, press downward with the finger into the flattened clay. Press hard enough to see the clay squish out from the finger without pressing the clay too thin. Do not roll the finger. Babies and small children have

Your print will be fired, finished with a silver jump ring, hand-stamped with the initials you specify, polished and mailed back to you at the address you provided within four to six weeks. The silver clay will shrink slightly during the firing process, making your finished print a bit smaller. If your fingerprint curls while drying, this is normal and it can be flattened out once fired. Do not try to flatten yourself or drop the print as it will break. **PURCHASED CHAINS WILL BE MAILED WITH THE FINISHED FINGERPRINTS.**

very fine ridges and may require extra firm pressure. The ridges may also be difficult to see.

A permanent mold may be made from the practice clay received in your kit. It is possible for us to make additional fingerprints from your mold providing it is a good fingerprint impression. (Many attempts can be made prior to baking to achieve the best possible fingerprint impression).

To make your practice clay fingerprint a permanent mold, place practice clay fingerprint on parchment paper on a baking sheet and bake in a conventional oven at 250 degrees for 15 - 20 minutes. The practice clay fingerprint will be pliable immediately after baking, therefore, do not touch until completely cool as to not distort the shape. Store in safe place for keeping. The cost of 1 kit + \$5 fee is required to make additional fingerprint pendant/charms or molds. Mold must be sent with a request and check, money order or credit card information + 7% tax (Iowa residents only).

Prairie Creations is not liable for poor fingerprints or handling of clay by customer prior to finishing. Prices are subject to change. If you are unhappy with your fingerprint, re-do kits are available, please call Prairie Creations at 712.246.1689 for more information. Original print must be returned along with payment before kit will be sent. Priceless Prints® are made with a special clay that is totally non-toxic and has been certified by an independent testing facility to be safe in every phase of its use. Though rare, it is possible for certain individuals to experience skin rash or itchiness after contact with the clay.
